Ocular Enterprises, has extensive experience in embedded systems programming and firmware for all types of devices from simple LCD drivers to the micro-controller for more challenged custom applications.

Our engineers can help you to choose the right drivers/micro-controller for your display, and assist you in making critical hardware/software decisions. We will quickly bring your firmware for the display to a prototype stage so that you can interface perfectly with your product without a glitch.

We will support all elements to their final stages, from development to market release.

The software development is in assembler for various types of LCD drivers and MCU, including:

- Sitronix ST70XX and ST75XX series
- Sitronix MCU ST20XX series
- Holtek MCU HT49R30
- Sunplus SPLC and SPLD series
- others.
